DMHRSi & Education and Training

Mike Stewart

Navy medicine Support Command

2009 Total Force Training Workshop

22-24 September 2009

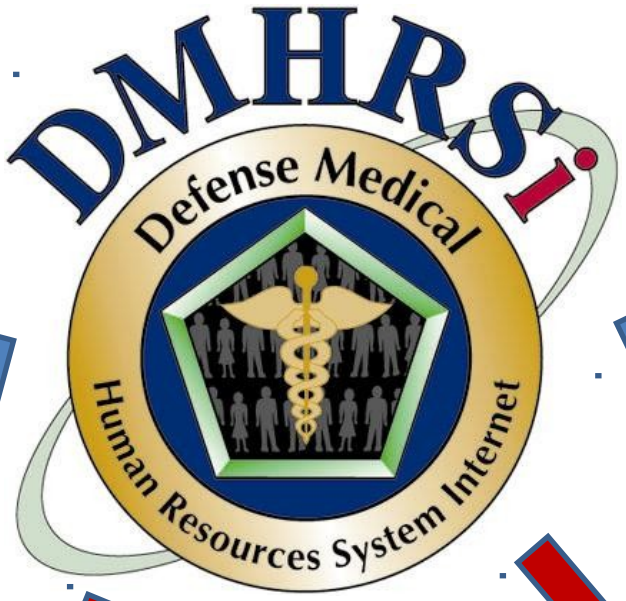
Why use DMHRSi for E&T?

- Provides for an Electronic Training Jacket (ETJ) for All Hands.
- Provides consistency from one command to another.
- Allows for easy viewing of training history of an individual, a command, or all BSO 18.
- Provides training completion for Readiness purposes

Readiness Data

Manpower Data

Labor Data



Personnel Data

Education & Training Data from FLTMPS MHS LEARN

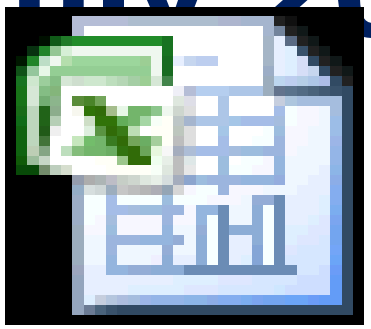
Labor Data
Feed to EAS (then to M2)
Feed to SMART

NPI Data
Feed to EWPD then to CCQAS and AHLTA

Status of DMHRSi

- Mandated by BUMED for use at all BSO 18 commands
- Fully deployed (NAVMISSA and METC this week)
- Army fully deployed and Air Force completes Sep 09
- Tutor processes soon to also be in UPK format
- Working on improvement of FLTMPS feed(contractors)
- Working on new interface agreements to receive data from BUPERs and DCPDS
- Data calls from BUMED, CNA, and TMA rely on DMHRSi
- Use of other applications at your command hurt data integrity

Recent Survey Results July 2009



Final E&T Survey Results

New Report Server

- Data loaded from DMHRSi several times a week and is not real time
- You have access to all reports
- Over 7 million E&T records for Navy
- Use it to check on data quality of your data.
- Easy to tell now who is and is not using the system.
- Welcome your feedback.

Common Problems

- Commands creating courses.
- Commands creating offerings.
- Not following standard naming conventions.
- Not associating Training Center to the class.
- Not changing sponsor from DOD to command.
- Leaving the “Restricted” box checked.
- Not updating enrollments
- NOT USING THE APPLICATION

Learning Paths

- Allows you to set training “Goals” or “Mandatory classes” for an individual, work center, job, or person type (i.e. all critical care nurses, all Lab Techs, everyone in the Emergency Room)
- It is a combination of one or more classes you wish a person to complete and which are mandatory and when you want them completed.
- Can be set to specify a number of days prior to the end of the target completion period for the application to notify the learner of the upcoming completion date.

Where we now stand

- We don’t see as many classes scheduled for the future

cheduled Classe

- We have a lot of students who have taken classes yet their enrollment status has not been updated.

Incomplete
Enrollments

- Several classes are not associated to a training center therefore are not visible to students

Classes not
iated to a Trainin

Way Forward

- We all have to use it more efficiently.
- We need to capture all readiness training in DMHRSi that is being recorded in EMPARTS
- We are scrubbing the list of all course in DMHRSi and the associated competencies. Hope to have a totally clean application by 1 October.
- We will continue to closely monitor every command’s utilization of the E&T module and report to regional commanders
